

ELCS PROGRAM SAVES DEALERSHIPS WC DOLLARS

The **Extended Loss Control Safety Program (ELCS)** can reduce insurance costs in Michigan dealerships. There are currently 97 dealerships on the program. These safety training programs if instituted and monitored on a continuing basis will prevent accidents, lower your exposure to MIOSHA citations and fines, and ultimately will minimize your cost of both workers' compensation and liability/property and casualty insurance. It will also provide a safe working environment for your employees which will increase their productivity and your bottom line.

The program normally includes quarterly in-house safety consulting sessions although the number of visits can be customized to meet your dealership's needs. The consultations will be designed to meet the specific needs of your dealership. The available services include but are not limited to:

1. Follow-up review of the recommendations made in your annual MADSIF safety survey.
2. Safety Audits targeted to monitor MIOSHA compliance.
3. Testing for Carbon Monoxide levels, monoxivent systems and noise levels. Testing in other areas would be recommended on an as needed basis. Testing results and associated corrections would be discussed with the appropriate management personnel.
4. Customization of the MADSIF Safety Manual to meet MIOSHA requirements. This would include a review of current safety policies and programs. The consultant would also review and customize your Emergency Preparedness Plan including preparing the required diagram.
5. Review of all training programs and documents.
6. Review of MIOSHA required training documentation.
7. Safety training sessions for all employees. The consultant will perform training sessions for employees. The consultant will also assist management in the appointment of a Safety Coordinator who will oversee all required safety training programs. The Safety Coordinator will be taught the specific duties related to the training and also the issues related to MIOSHA compliance. The consultant will train the coordinator in the maintenance of required safety training records.

The ELCS program will be tailored to the individual dealerships needs with the goal of improving employee safety and reducing your dealership's long-term insurance costs.

The cost of the program is \$550.00 per visit.
